DASHBOARD

Monitor your business performance quickly, succinctly, and in real-time. With an easily understandable dashboard, it enables business owners to track business performance anytime and anywhere.

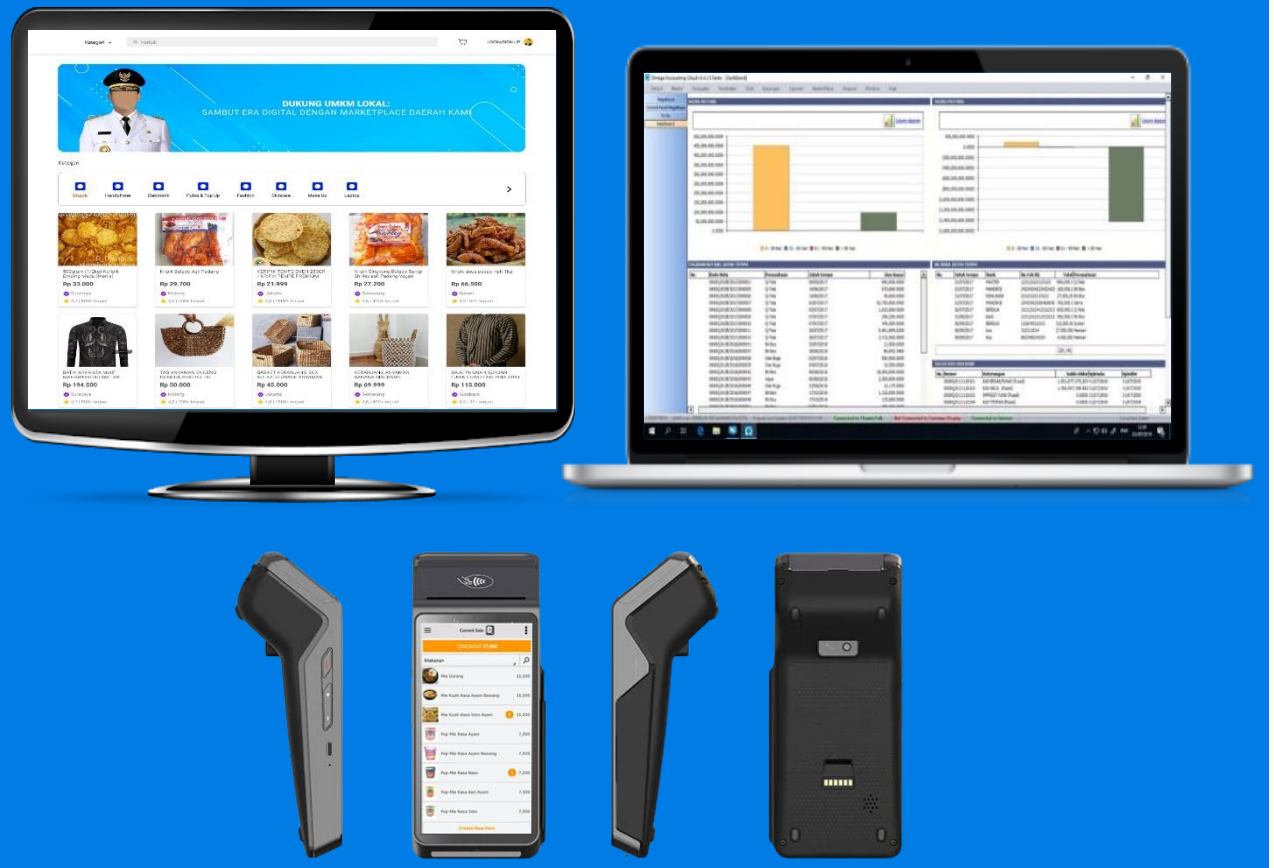

OMEGA MARKETPLACE

Omega Marketplace is an online platform connecting sellers and buyers, facilitating transactions for a wide range of products and services. In a marketplace, sellers showcase their offerings while buyers browse and make purchases, all within the digital realm. Marketplace platforms provide a convenient avenue for commercial exchange, connecting sellers with a broad audience of potential buyers in the online space.

OMEGA MARKETPLACE for LOCAL SMEs

"Omega Marketplace for Local SMEs" offers an innovative solution specifically designed to advance local SMEs in the region. Local SMEs can seamlessly sell their products and services online to a broader market, enabling them to grow their businesses more rapidly and efficiently. Integrated with the Omega POS system used by SMEs and a dashboard feature utilized by local governments, **Omega Marketplace for Local SMEs** enables monitoring of various aspects of SMEs performance and operations.

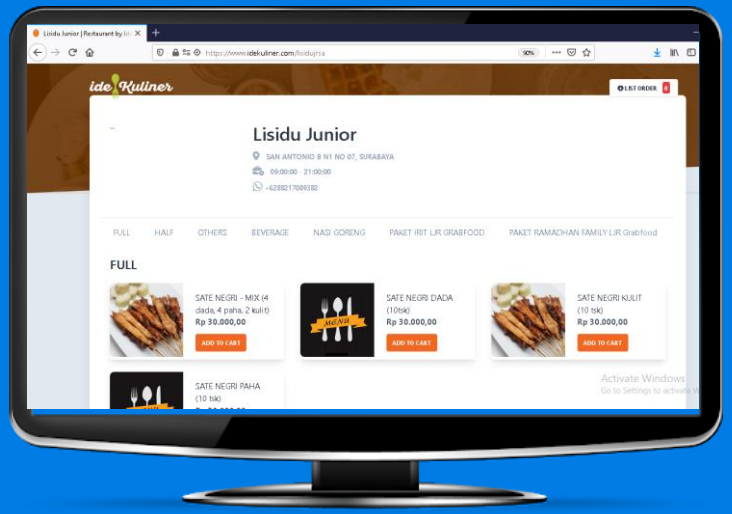

OMEGA E-COMMERCE

Omega e-Commerce is platform facilitating transactions between merchants and buyers, fully integrated with the Omega POS Cashier Application. This website encompasses stock management, order processing, payment handling, and customer database functions, streamlining business operations for merchants with ease and speed.

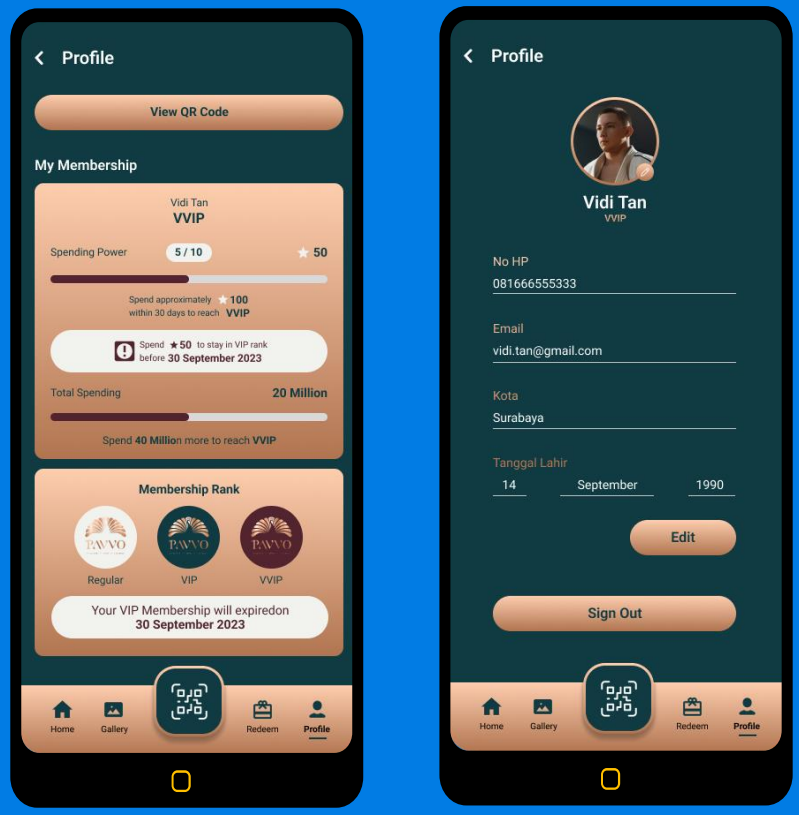

IDEKULINER

Idekuliner offers a landing page solution for restaurants. Idekuliner landing page is equipped with a payment gateway system, facilitating seamless ordering and payment for customers. Moreover, Idekulinercan function as a self-order menu system for FnB businesses. This landing page is integrated with the Omega POS system.

OMEGA LOYALTY APP

The Omega Loyalty App is a platform designed to reward customers and provide information on ongoing promotions. This loyalty app facilitates delivery orders for customers, offering convenience. Moreover, the Omega Loyalty App is directly linked to Omega POS system, ensuring seamless integration.

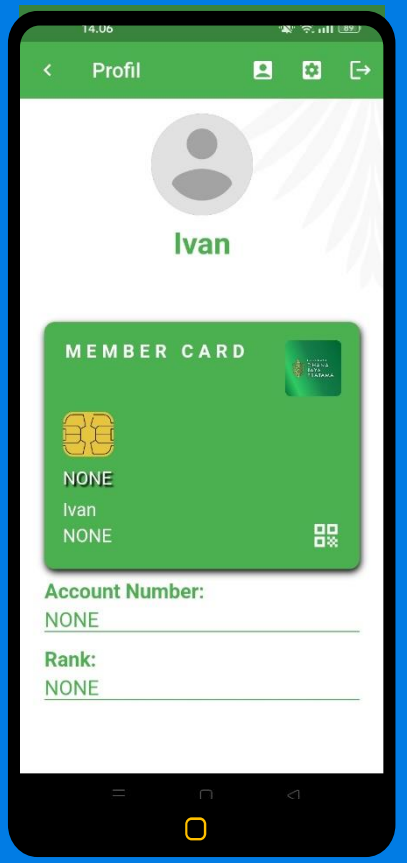

OMEGA COOPERATIVE

Omega for Cooperatives is utilized to support the operational system of cooperatives, from front office to back office. Its features include :

- Member Card
- Balance Information
- Transaction History
- Fixed Deposit List
- Loans
- Fund Transfers
- Withdrawals
- Top-Up
- Integrated with Omegsoft System, etc.

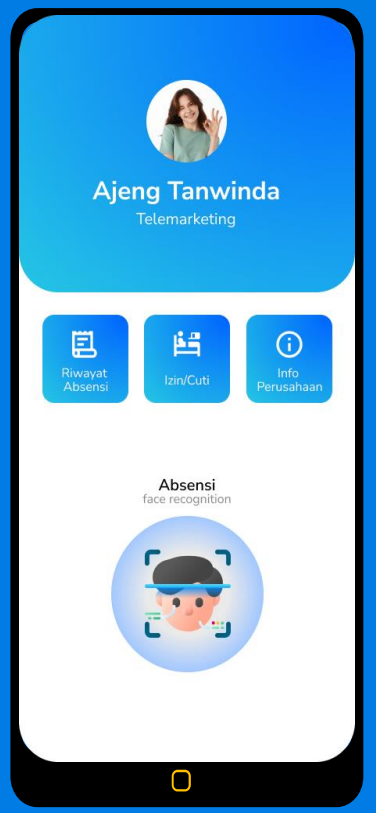

OMEGA PAYROLL

Omega Payroll is an innovative application specifically designed to streamline employee attendance using advanced technology. Its main features include face recognition and geotagging.

Omega Payroll ensures efficiency in attendance management by integrating technology, providing a comfortable and accurate experience for employees, and simplifying the company's administrative tasks.

OMEGA IoT (INTERNET OF THINGS)

Omega IoT is the first innovative product in Indonesia that combines QR Code technology, self-service machine systems, payment gateways, POS software, and accounting software. Omega IoT includes:

- Omega IoT – Vending Machine
- Omega IoT – Laundry Machine
- Omega IoT – Billiard Billing
- Omega IoT – Playstation Billing

QR Code Standar Pembayaran Nasional

OMEGA IoT – Vending Machine

The Vending Machines are equipped with IoT systems and software to facilitate sales recording, inventory management, and reporting. These vending machines also feature QR Code payment capabilities, providing customers with a more efficient payment system.

QRIS
QR Code Standar Pembayaran Nasional

OMEGA IoT – BILLING BILLIARD

The Internet of Things (IoT) for billiard machines involves the integration of advanced technologies to monitor, manage, and improve pool machine performance in an efficient and connected manner. By applying IoT to pool machines, information such as operational status, game activity and productivity of each table can be recorded accurately in real-time via the internet network.
